The Beahrs Environmental Leadership Program (Beahrs ELP) of UC Berkeley’s College of Natural Resources provides state-of-the-art training in **environmental and natural resource science, policy, and leadership** to strengthen the capacities of global environmental practitioners.

Participants will benefit from a unique opportunity to interact with the leading experts at UC Berkeley as well as their global peers to access the latest information and tools, share practical experiences, and develop collaborative leadership skills. As of 2019, the Beahrs ELP has graduated 704 environmental leaders from over 110 countries.

### Benefits
- UC Berkeley certificate in **Sustainable Environmental Management**
- Enhanced capacity to develop solutions that balance environmental, economic, and social equity objectives
- Strengthened skills for communicating ideas, facilitating multi-stakeholder processes, and leading social change
- Lifetime membership in the world-wide Berkeley ELP Alumni Network

### Who Should Attend?
Beahrs ELP participants are mid-career development and environmental professionals who are challenged to solve complex cross-sectoral environmental problems from a wide range of disciplinary, geographic, and organizational backgrounds including nonprofit and community-based organizations, applied research and education institutions, government, international agencies, and the private sector.

Notable alumni include two recipients of the Goldman Environmental Prize as well as representatives from the World Bank, the United Nations, and government ministries of health, rural development, agriculture, and the environment.

### Program Highlights
- **Business Skills and Leadership Development:**
  - Conflict Resolution & Collaborative Leadership
  - Corporate Social Responsibility
  - Project Management
  - Communications
  - Grantwriting
  - Fundraising
  - Marketing
  - Behavior Design

- **Approaches to Environmental Issues:**
  - Mitigation of & Adaptation to Climate Change
  - Policies for Sustainable Development
  - Food, Agroecology & Biotechnology
  - Sustainable Livelihoods
  - Quantitative Analysis
  - Population & Health
  - Impact Assessment
  - Sustainable Energy
  - Conservation
  - Biodiversity
  - Resources
  - Water

### University of California, Berkeley
**Three-week Certificate Program**
**Saturday, July 18 - Friday August 7, 2020**

Partial scholarships available for qualified candidates
Alumni Testimonials

“The Bearhs ELP provided the space for the participants to see the big picture in order to make the world a better place. Seeing the big picture is as important as understanding the details and complexities of the problem and is vital for generating creative solutions to our environmental problems. An array of competencies from technical, communication, and leadership skills were offered by the Beahrs ELP to ensure the participants are equipped to face new current and future environmental challenges. The experience aided my growth as an environmental professional.”

Divina Lade, Philippines (ELP 2018)
Manager, Behavior Training, RARE INC

“On seven occasions, I tried to get into the Beahrs Environmental Leadership Program. I wasn’t successful due to several factors, but I never stopped trying. As a conservation, environmental and natural resource management practitioner, I have learned to be optimistic, determined and persistent. By interacting and networking with my colleagues in the program on various crucial topics, I have diversified my perspectives, learned from successes, understood challenges and the effects it has on people, economies, and the planet, developed renewed vigor to pursue my goals of being an Agent of Change. I have refined my perspectives and appreciate the principles and practice of networking and this, I will use to effect change moving forward.”

Borwen Sayon, Liberia, (ELP 2018)
Deputy Managing Director, Forestry Development Authority

“I was able to access new and innovative information regarding global environmental issues as well as other social and political topics necessary to deal with the most pressing environmental problems in Latin-America. In my opinion, the most decisive ELP course was ‘Collaborative Leadership for Sustainable Change’ with Susan Carpenter. This course was an innovative and practical way to address environmental and indigenous requirements in my country. Carpenter’s course taught me that conflict solution is a process where dialogue and joint group collaboration are important, but the use of technical tools is decisive too.”

Carlos Trinidad Alvarado, Peru (ELP 2017)
Legal Advisor in Financial Terms, Peruvian Society for Environmental Law

“Attending ELP was a life-changing experiences that I will never forget. I enjoyed learning from classmates and professors through group work, open-minded team discussions, and in-class activities. One of the biggest differences that I saw that existed between programs in China and at UC Berkeley was that sessions at UC Berkeley were extremely well-organized and the professors were always open-minded and encouraging. The passion they have for environment conservation have shown me what is possible through hard work. I believe that with the knowledge and skills that I have gained through the program, I will take my conservation efforts to the next level.”

Dorje Jyal, Tibet/China, (ELP 2018)
Project Manager, Wildlife Conservation Society
